

NV10 bank note validator

Since developing the world's first low cost, multi-currency bank note validators, Innovative Technology (ITL) has rapidly grown to become a major supplier to manufacturers worldwide. Our track record in research, development and cutting edge innovation is substantiated by our unique SPF™ core technology that ensures an industry-leading acceptance rate for multi-currency banknotes of typically **99.8%**. With distribution throughout 70 countries worldwide, backed by a global network of sales and service providers, ITL is delivering more profitable solutions wherever there is a need for higher automated transaction performance.

Currency database for many countries available free over the internet. Cloning – NV10 to NV10 re-programming for easy in-the-field updates. Currency and firmware programming via PC.

Kevlar lined belts to drive the bank notes right through the validator.

New advanced florescence detector to reveal hidden security features.

New arm processor with 0.5Mbyte FLASH memory, allowing multiple currencies in all four note orientations.

Best value: Easy to fit, simple to service and designed for long life.

Direct replacement for NV8 – same dimensions, connections and communication protocols.

Simple to interface – including parallel, pulse, SSP (Smiley Secure Protocol), CCTalk, MDB, and more. Single note escrow function.
